

PFR Series Flame Retardant Tube (Double Layer)

PFR

Flame Retardant Tube (Double Layer)

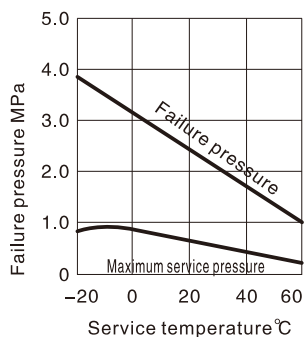

Product Features

- Inner high resilience PU tube, outer flame retardant layer refractory resin, effectively achieve flame retardant.
- Fire retardant flower, anti-splash effect, flame retardant effect equivalent to UL94-V0 level.
- Product usage: Determine the mounting length from the mounting to the quick-plug connector. Peel off only the outer layer with a peel tool. Install the inner pipe to the quick plug connector.
- Suitable for automobile welding fixture, robot welding and other flame-proof spray field.

Specifications

Model Number	PFR040X025	PFR060X040	PFR080X050	PFR100X065	PFR120X080	PFR140X100	PFR160X120
Use fluid	Air and water						
Maximum working pressure (at 20°C)	1.0MPa						
Ambient humidity and operating fluid temperature	-20°C+60°C water occasions 0~40 °C (when frozen)						
Material	Inner tube	Polyurethane					
	Outer tube	Refractory resin equivalent to UL94-V0 level
